From: Tom Olson, Olson Technology, Inc.
December 1, 2017

Dear Customers and Vendors:

Antronix of California, a subsidiary of Antronix Inc., has acquired the business operations and assets of Olson Technology, Inc. of Mi-Wuk Village, California.

The Olson Technology products and brand will continue to be marketed by its distributor's as Olson Technology.

Our business will continue to provide the same high-quality products and engineering services on which we have built our reputation. This change will in no way affect our company policy or manner of conducting business. As such, the business activities along with their most important asset, our people will continue as usual.

Joining the Antronix family will allow us to expand, grow and continue delivering industry-leading fiber optic solutions for the broadband, telecommunications and military sectors. Antronix is the perfect partner for us as we continue to expand and grow our business. We are thrilled to become a part of such a prestigious and innovative organization.

Antronix of California will operate as a standalone business unit – albeit with increased resources and capabilities from Antronix Inc.

The Olson Technology management team will continue to operate the business unit. The same dedicated employees you work with today will be here as well. The team will be augmented with the appointment of Peter Tarquinio as interim General Manager.

This is an exciting time for both Antronix and Olson Technology. 2017 marks Antronix's 37th anniversary and Olson Technology's 32nd anniversary. Antronix and Olson Technology share a legacy of being pioneers in the RF, microwave, HFC and fiber optics businesses. We appreciate your efforts on our behalf for the past 32 years and we look forward to the future

Regards

Tom Olson
